

Your Body Measures

SizeYou facilitates those who work with human body measurements

In studio measurement collection

SizeYou is an interactive solution, which records the ISO anthropometric measurements via mobile device, and creates the file of the measured subject.

Through a process of image analysis of photos taken from mobile device, the algorithms dynamically define the collection points on the body, reproducing the steps of a manual measurement, according to the ISAK protocol.

Thanks to the protection of the user identity and process precision, SizeYou lends itself to multiple applications.

It provides a customer service with a dedicated contact referent.

SizeYou facilitates those who work with human body measurements

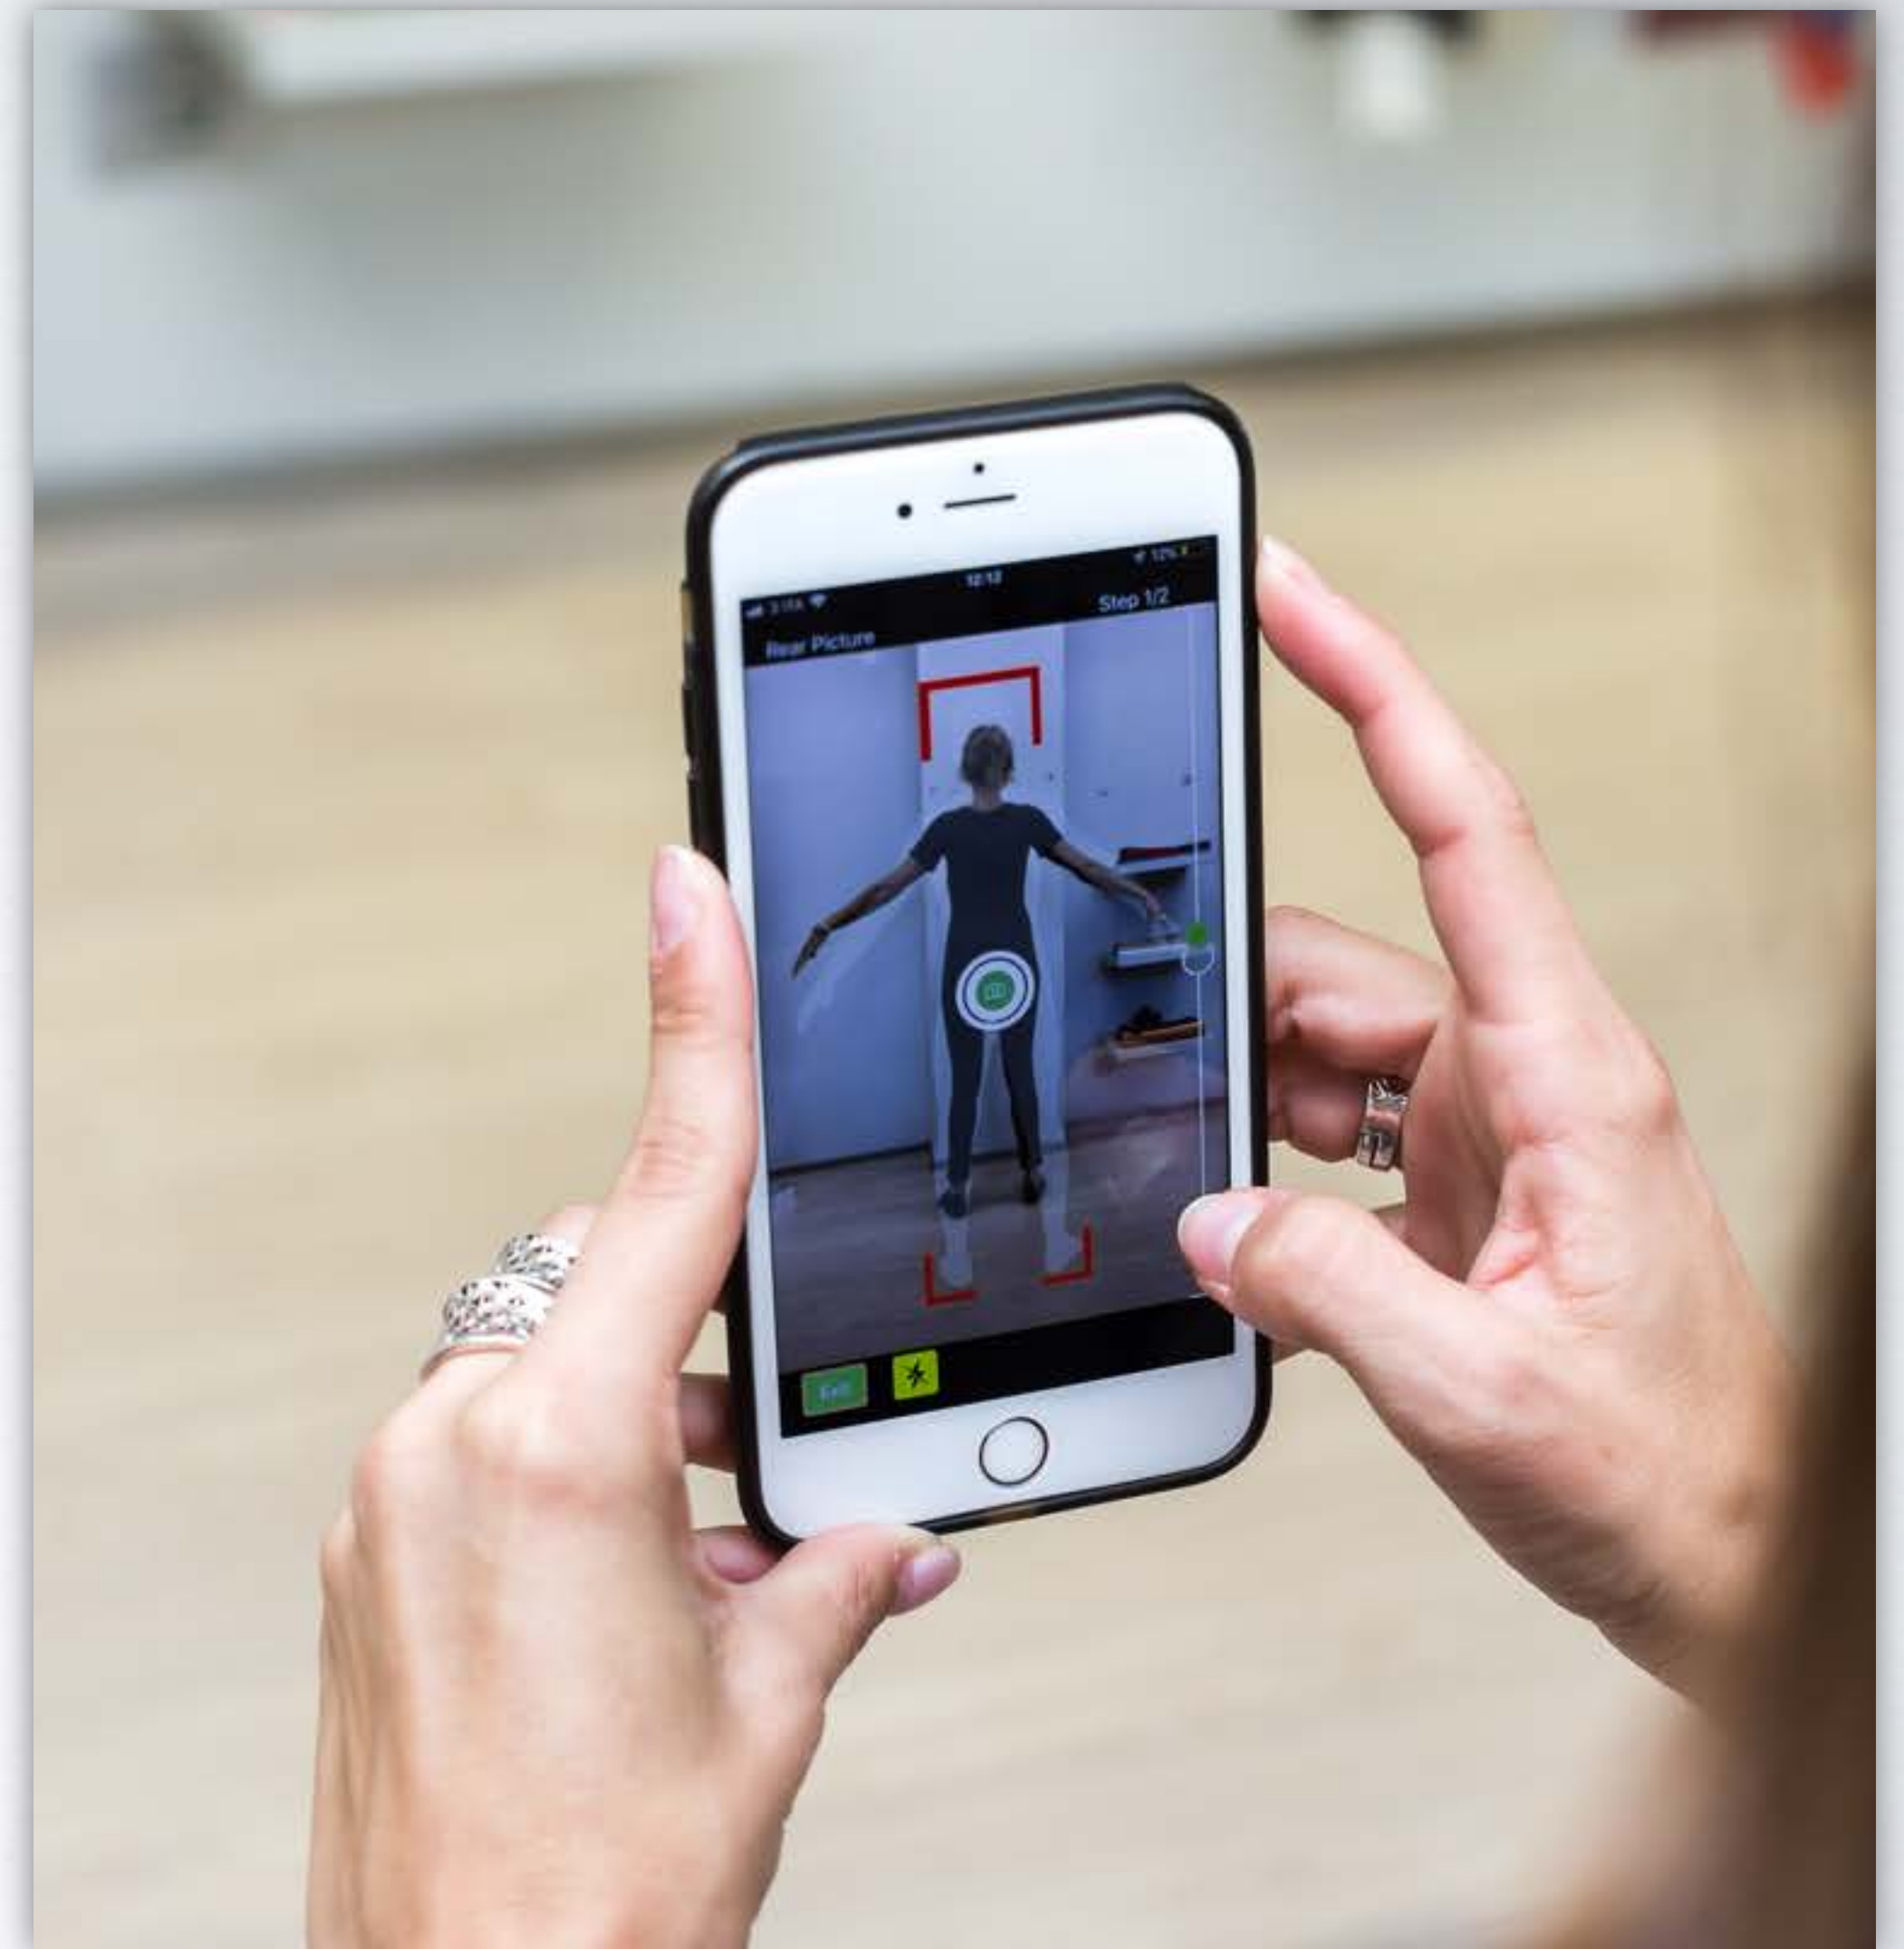

Remote Measurement Collection

SizeYou eliminates the distance between the professionals and the users.

It allows the end-user to collect measurements at home in a guided, controlled and precise manner.

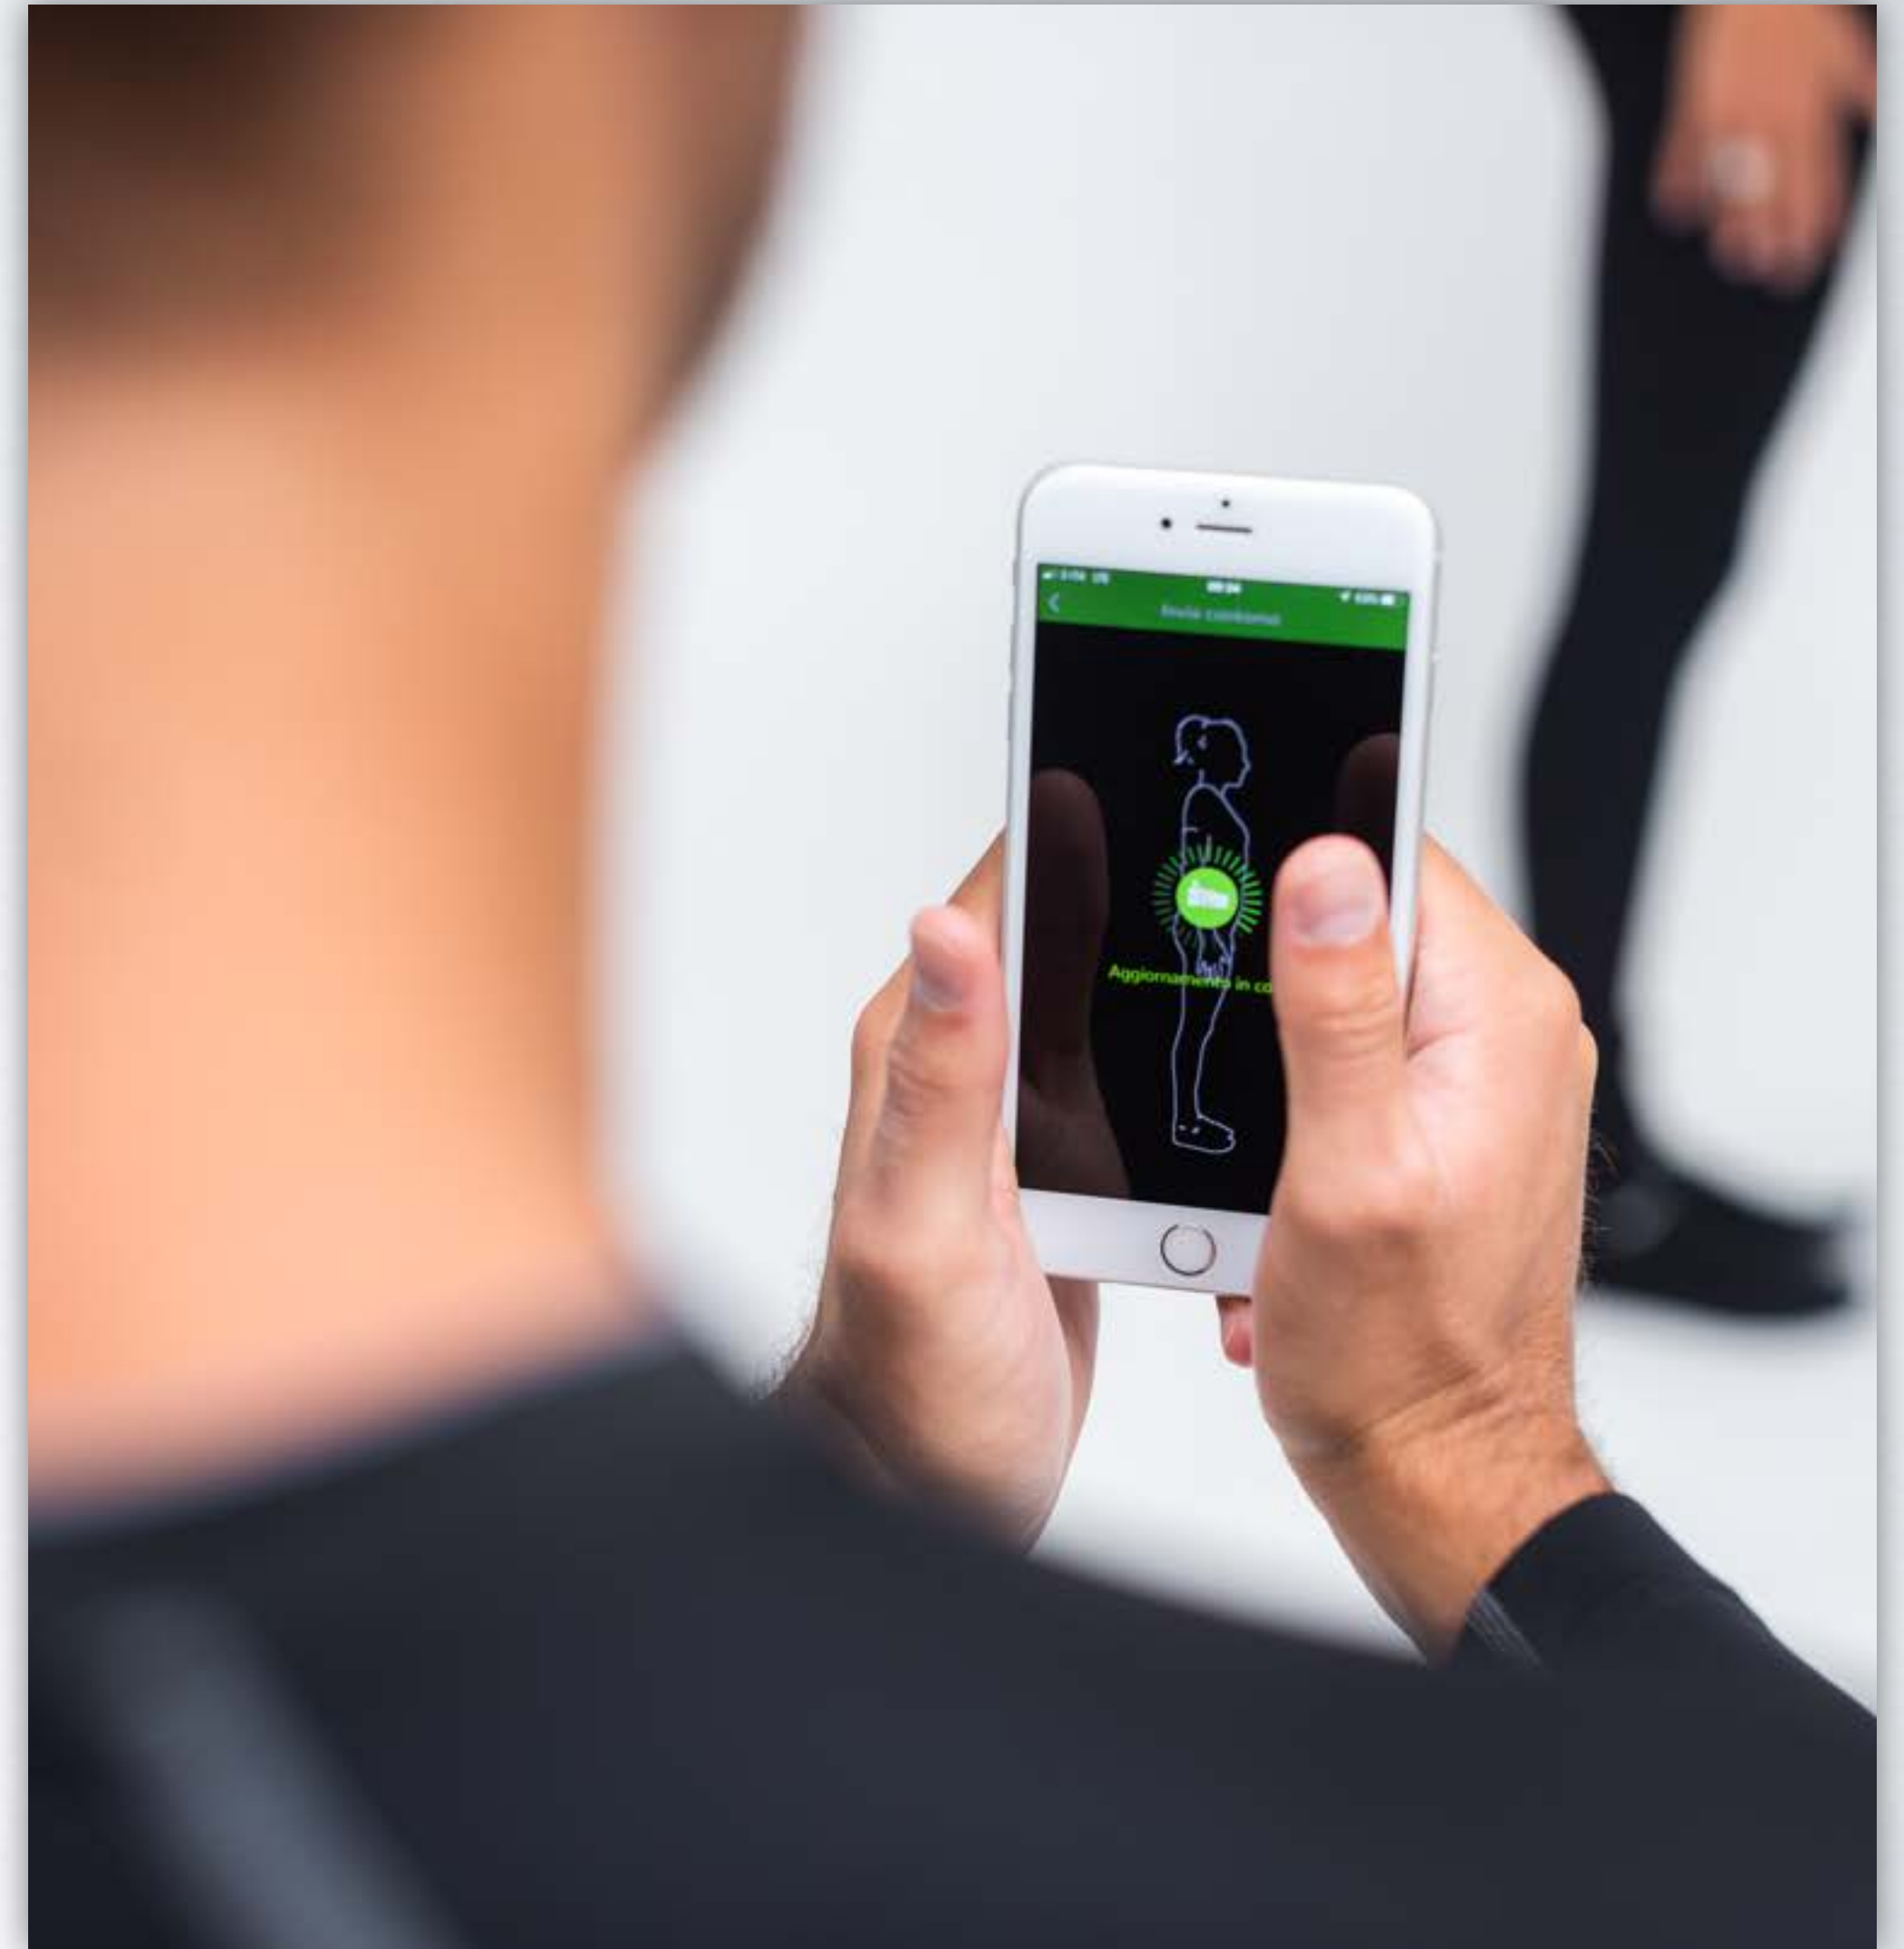

It allows the professionals to receive reliable real-time measurements in the dedicated BackOffice

It enables the provision of online professional services

SizeYou Benefits

- It reduces measurement collection time.
- It reduces the inaccuracies of the manual process, making the measurement objective.
- It eliminates manual data upload.
- It provides detailed user files, always accessible, with intuitive graphics.
- It provides a 3D representation of the body.
- It increases the level of interaction and customer loyalty.
- It requires only the use of a smartphone.

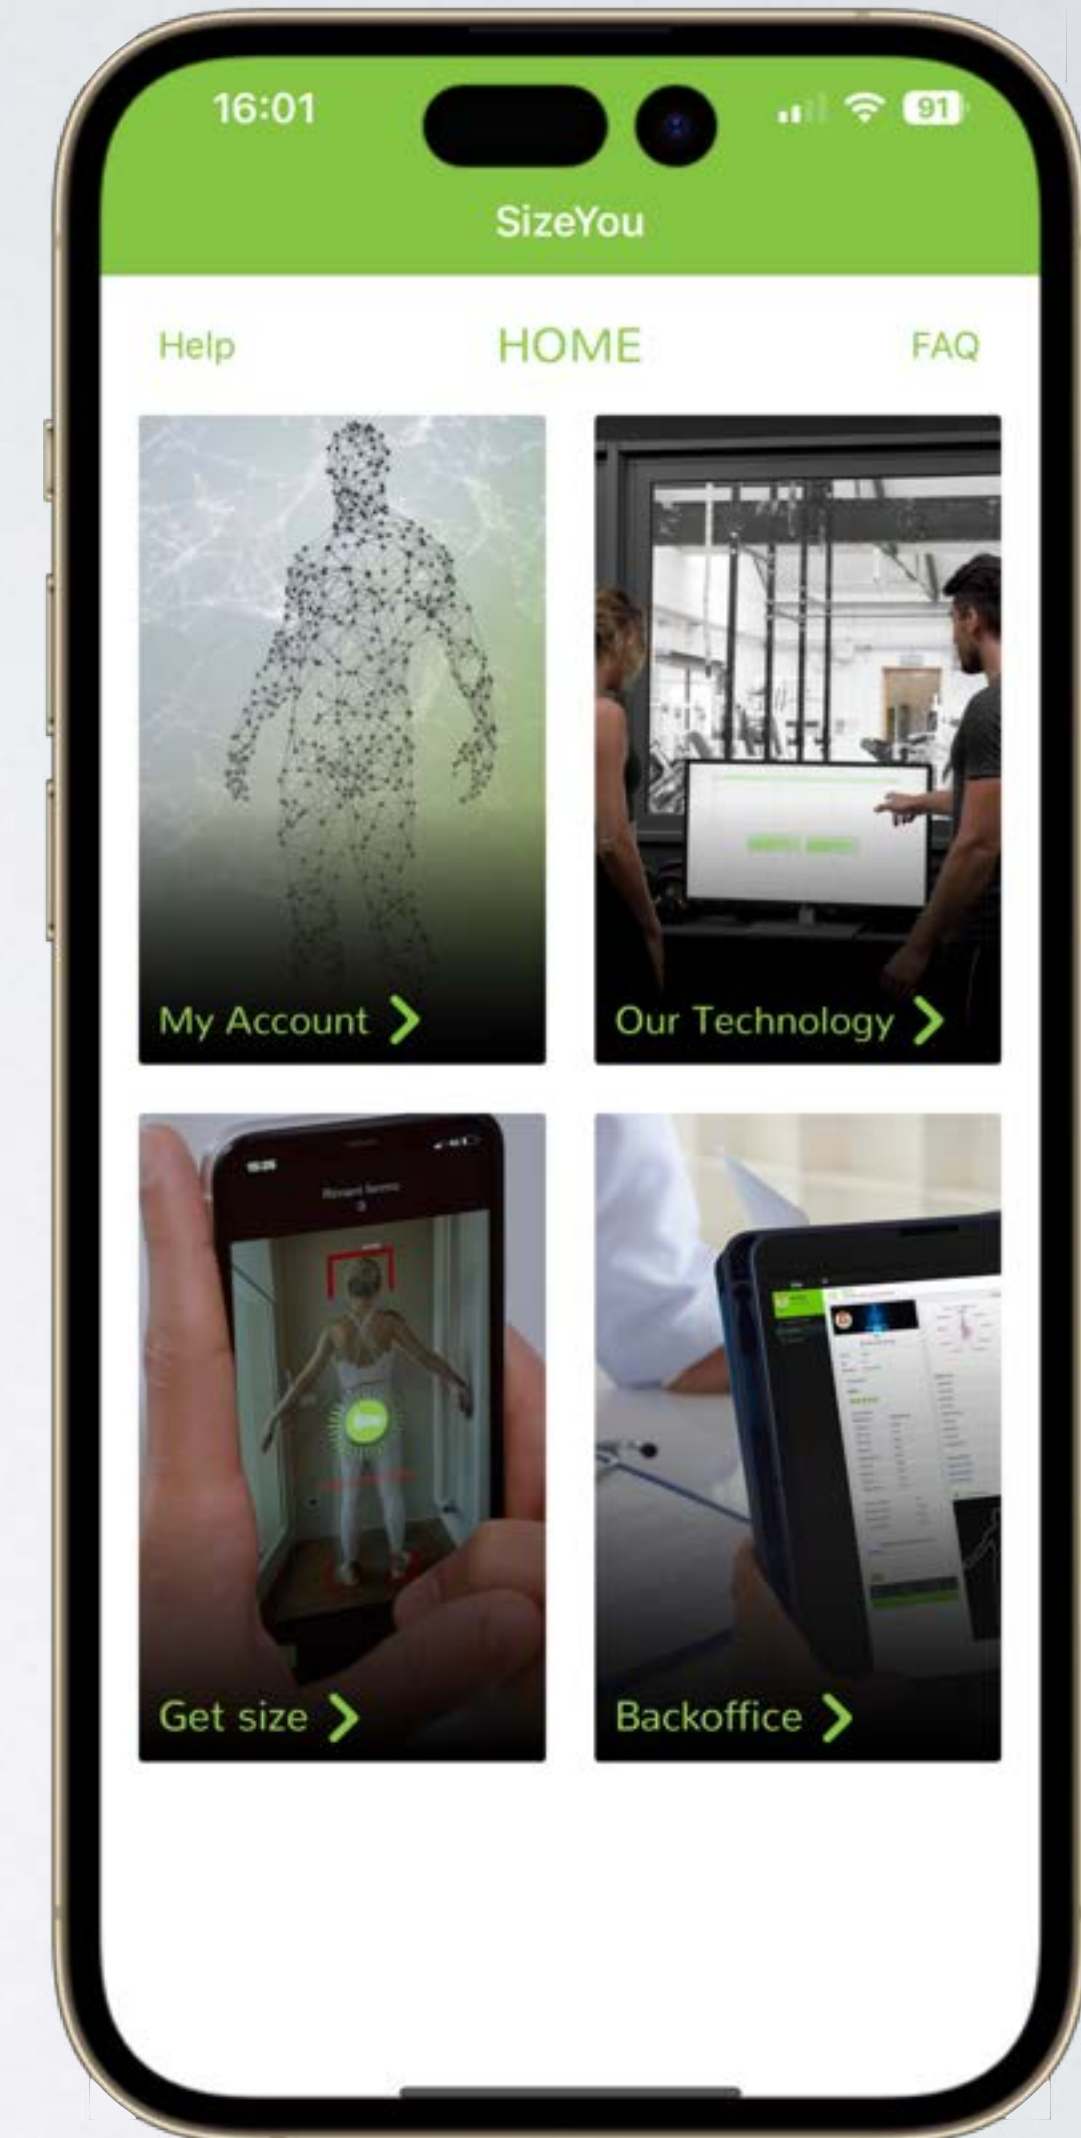

SizeYou App

The App guides the user in the shooting phases, highlighting any mistakes about the subject position, and suggesting corrective actions.

The measurement procedure guarantees comparable results. The professional thus has the certainty of always obtaining reliable data.

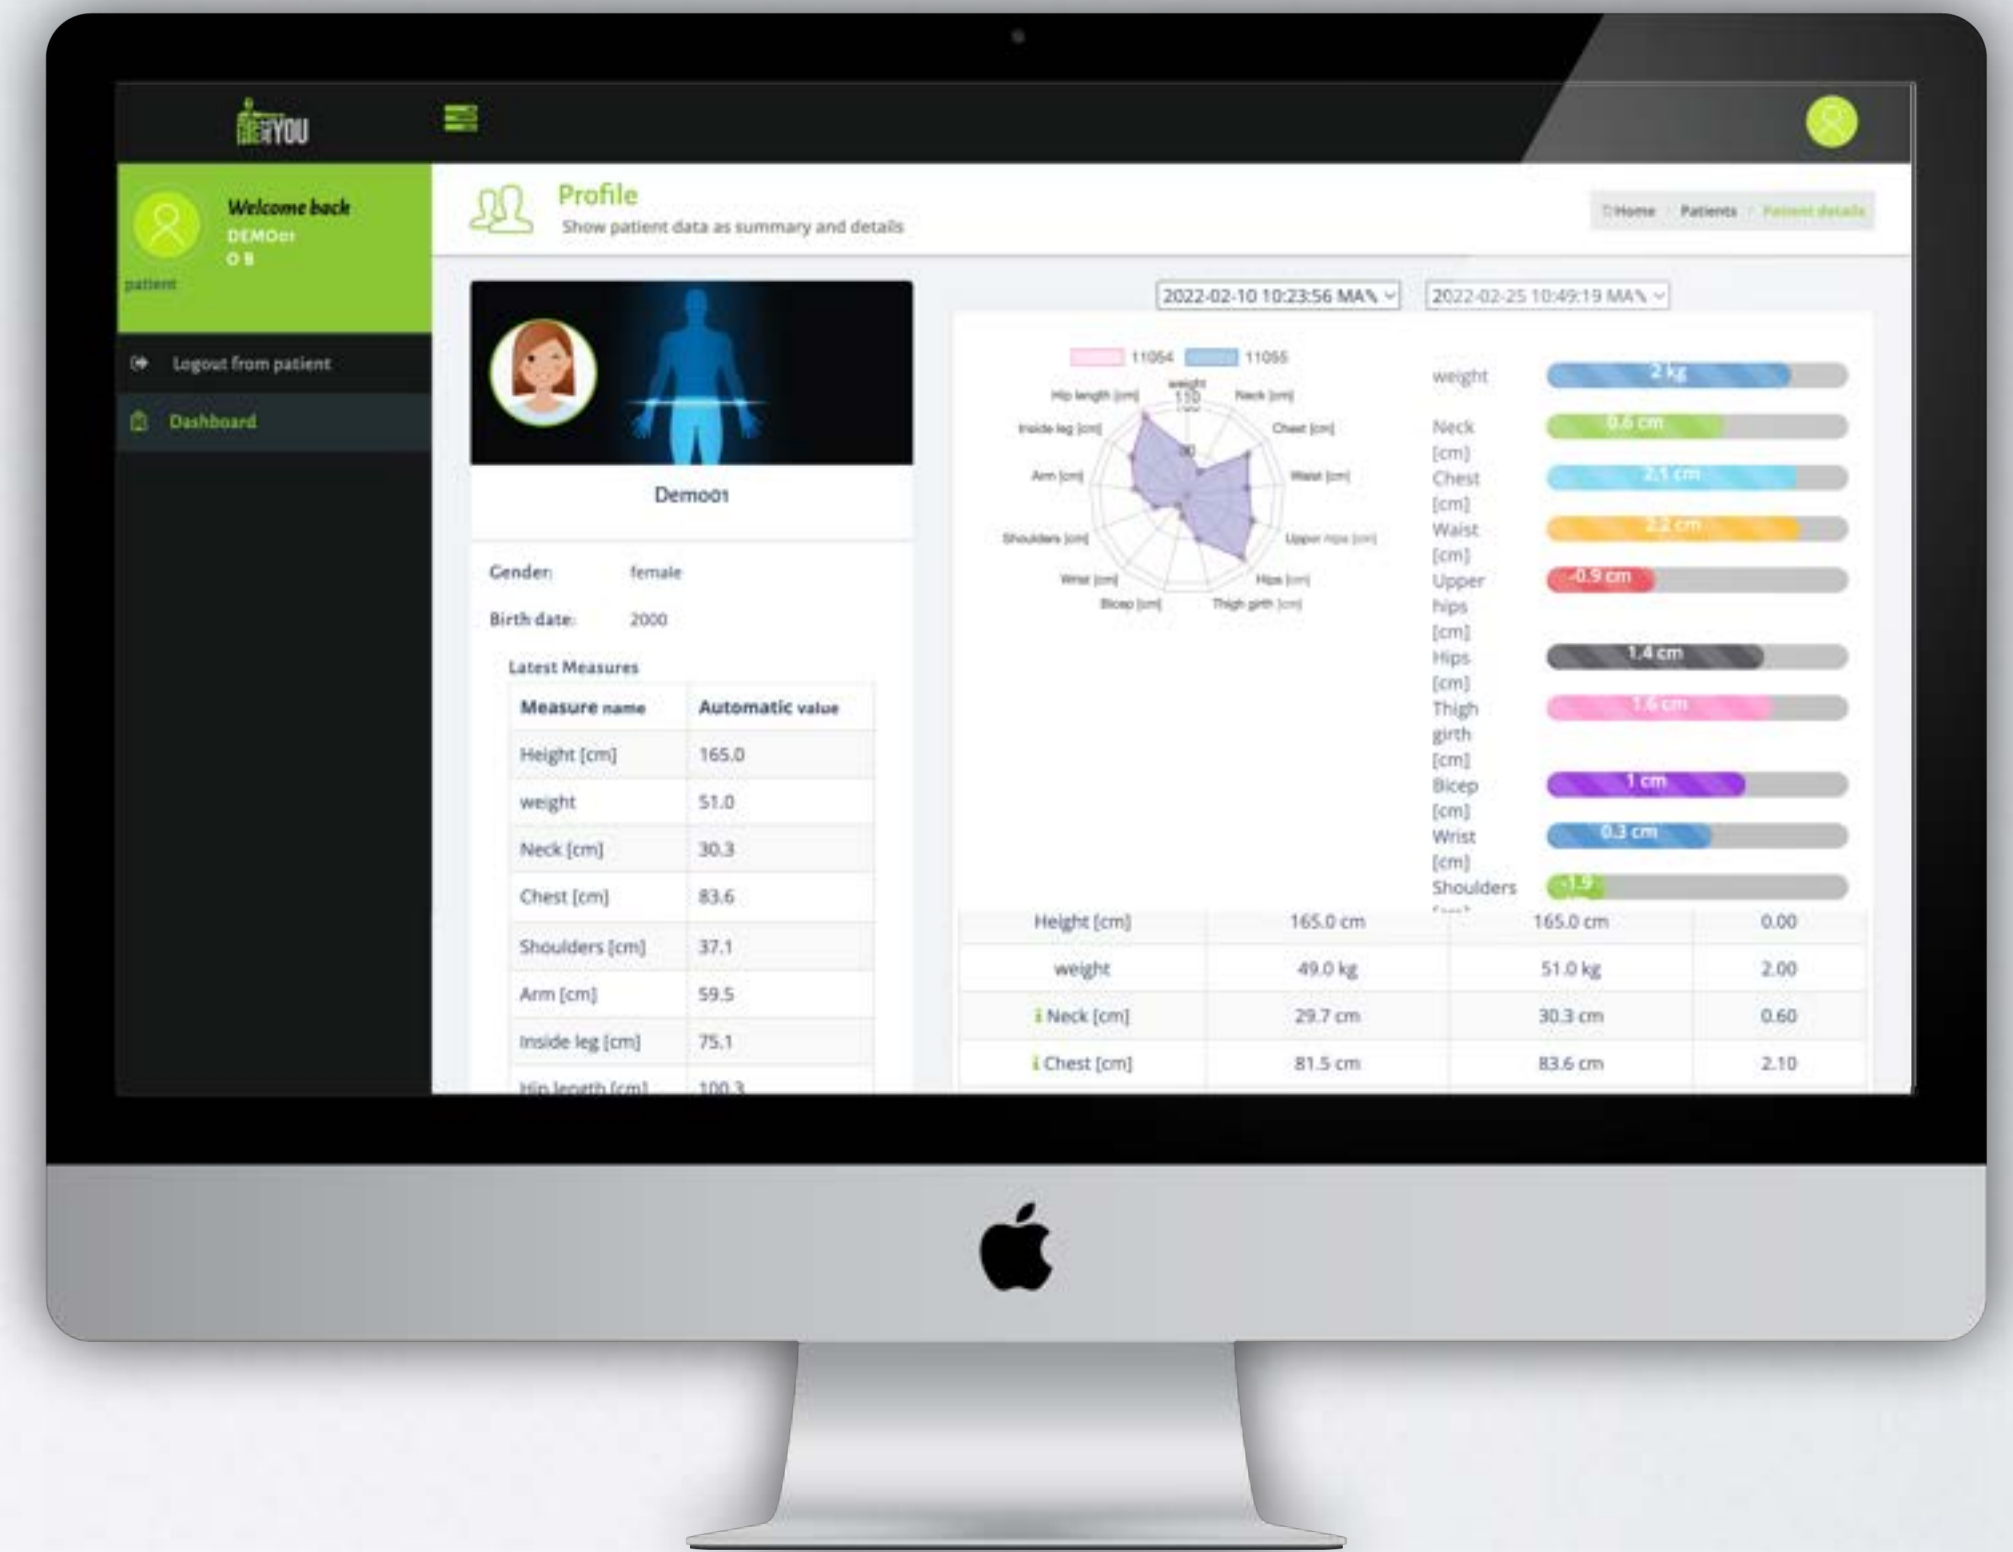

The App is downloadable from the Apple App Store and from Google Play Store.

Professional BackOffice...

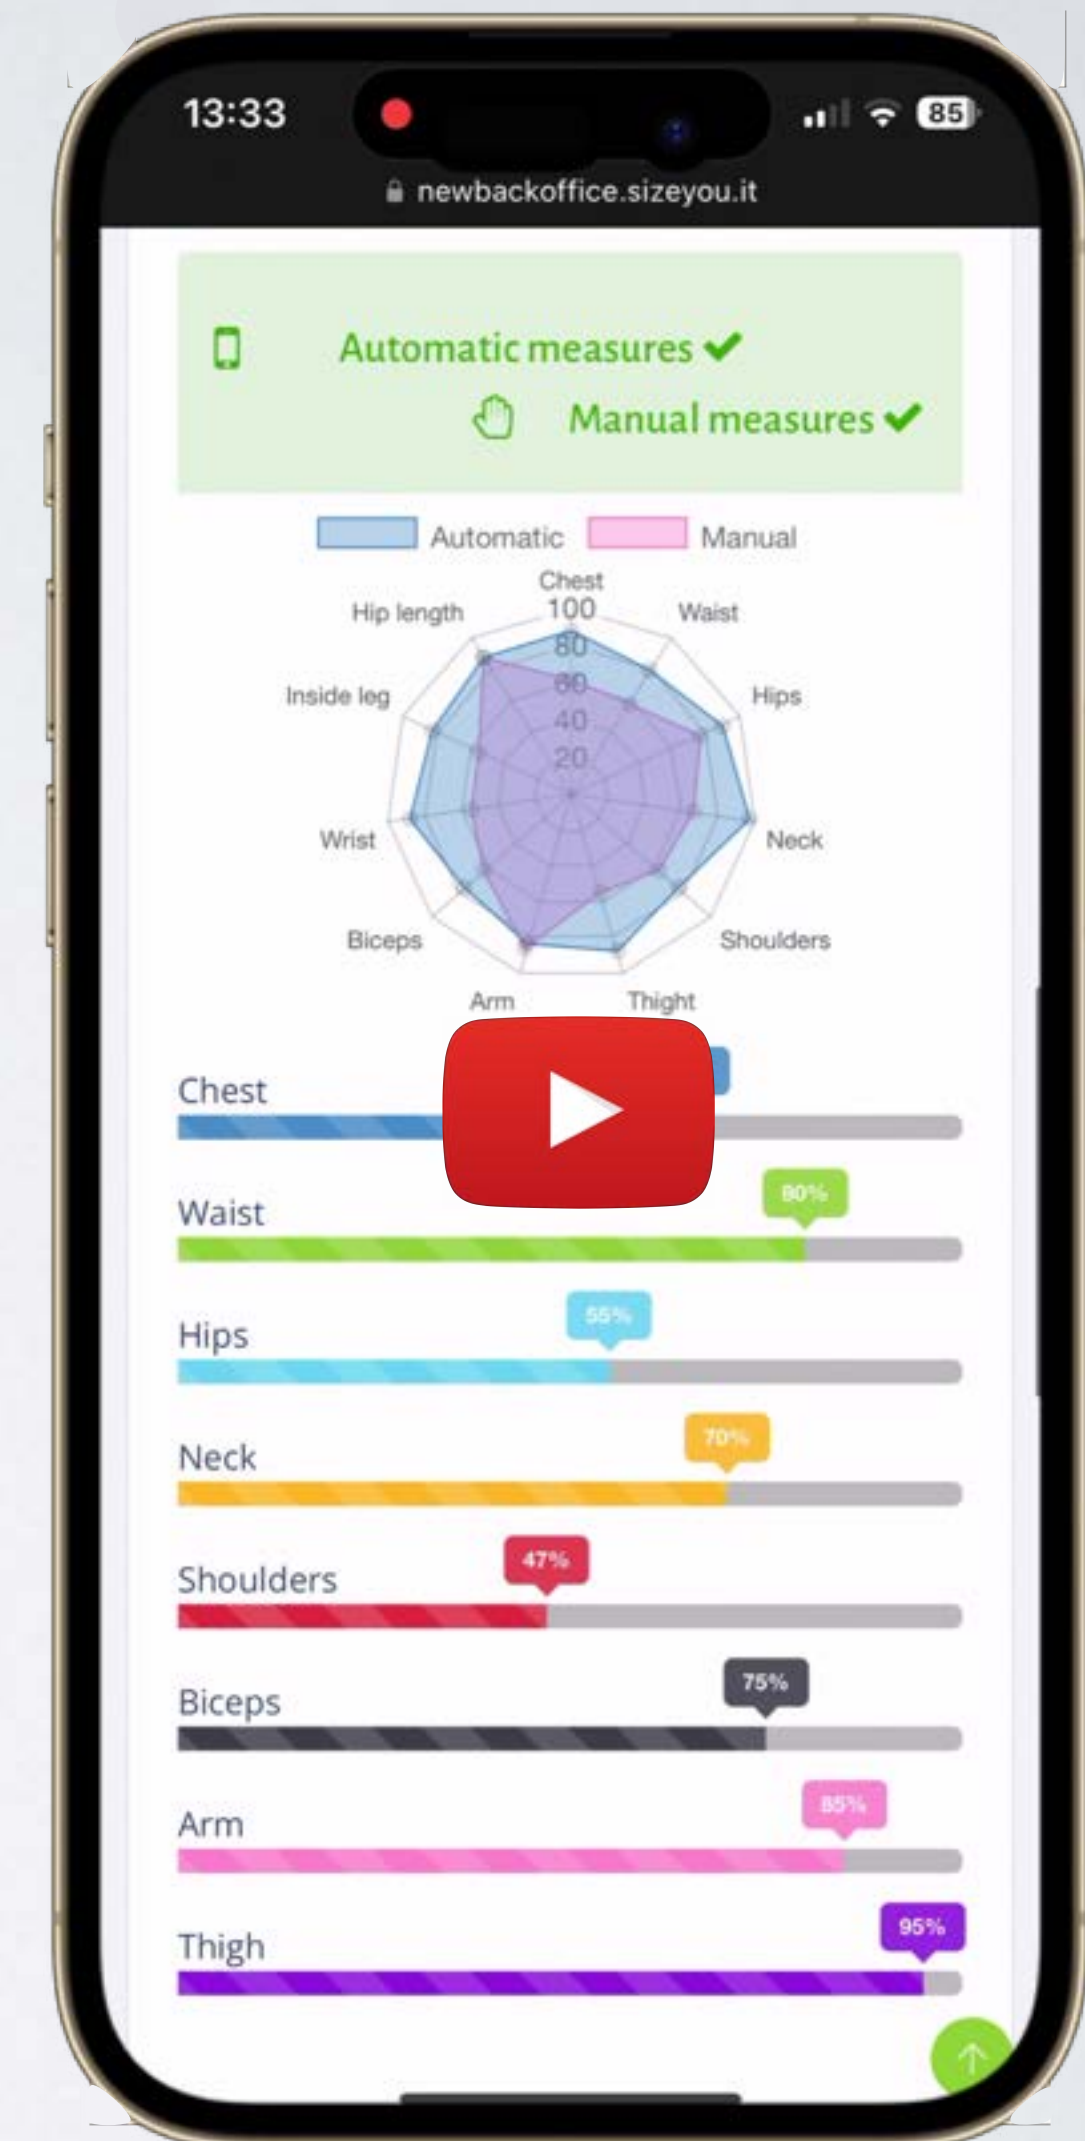

With SizeYou BackOffice you can:

- Login into the user dashboard
- Analyze the automatic measurements in the user file and compare them over time
- View the contours extracted from the user image and related photographs
- Export data tables and user images in Excel or Pdf files
- Use it from the App or from a web browser

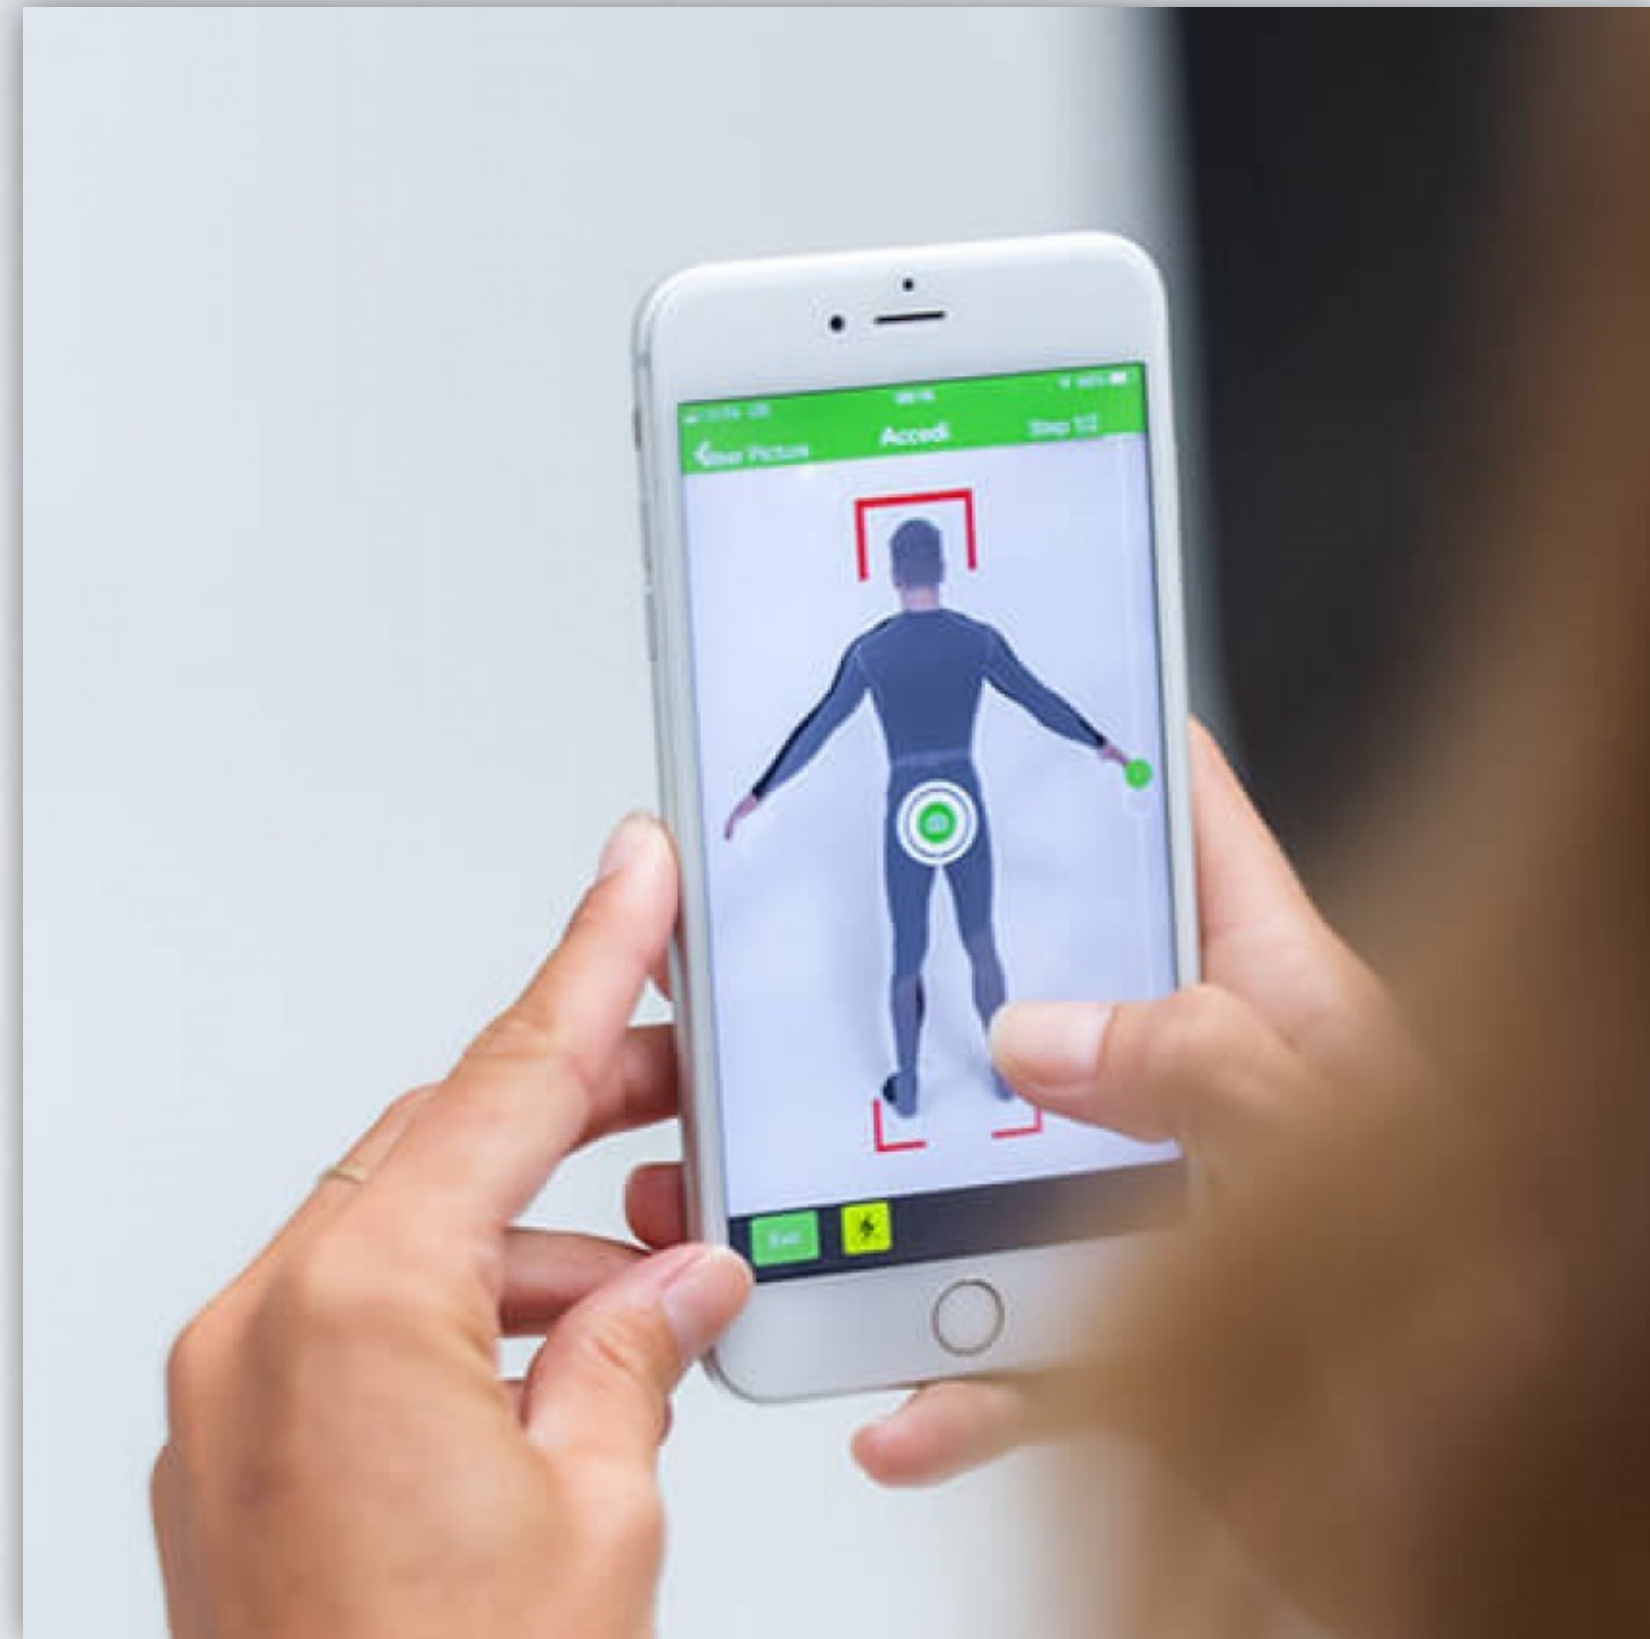

... at hand

- The use of the BackOffice is also optimised both from Smartphone and Tablet.
- If enabled by the professional, users can also access their personal files directly from the App.
- The BackOffice features are constantly updated, to guarantee the optimal user experience for end-users and professionals.

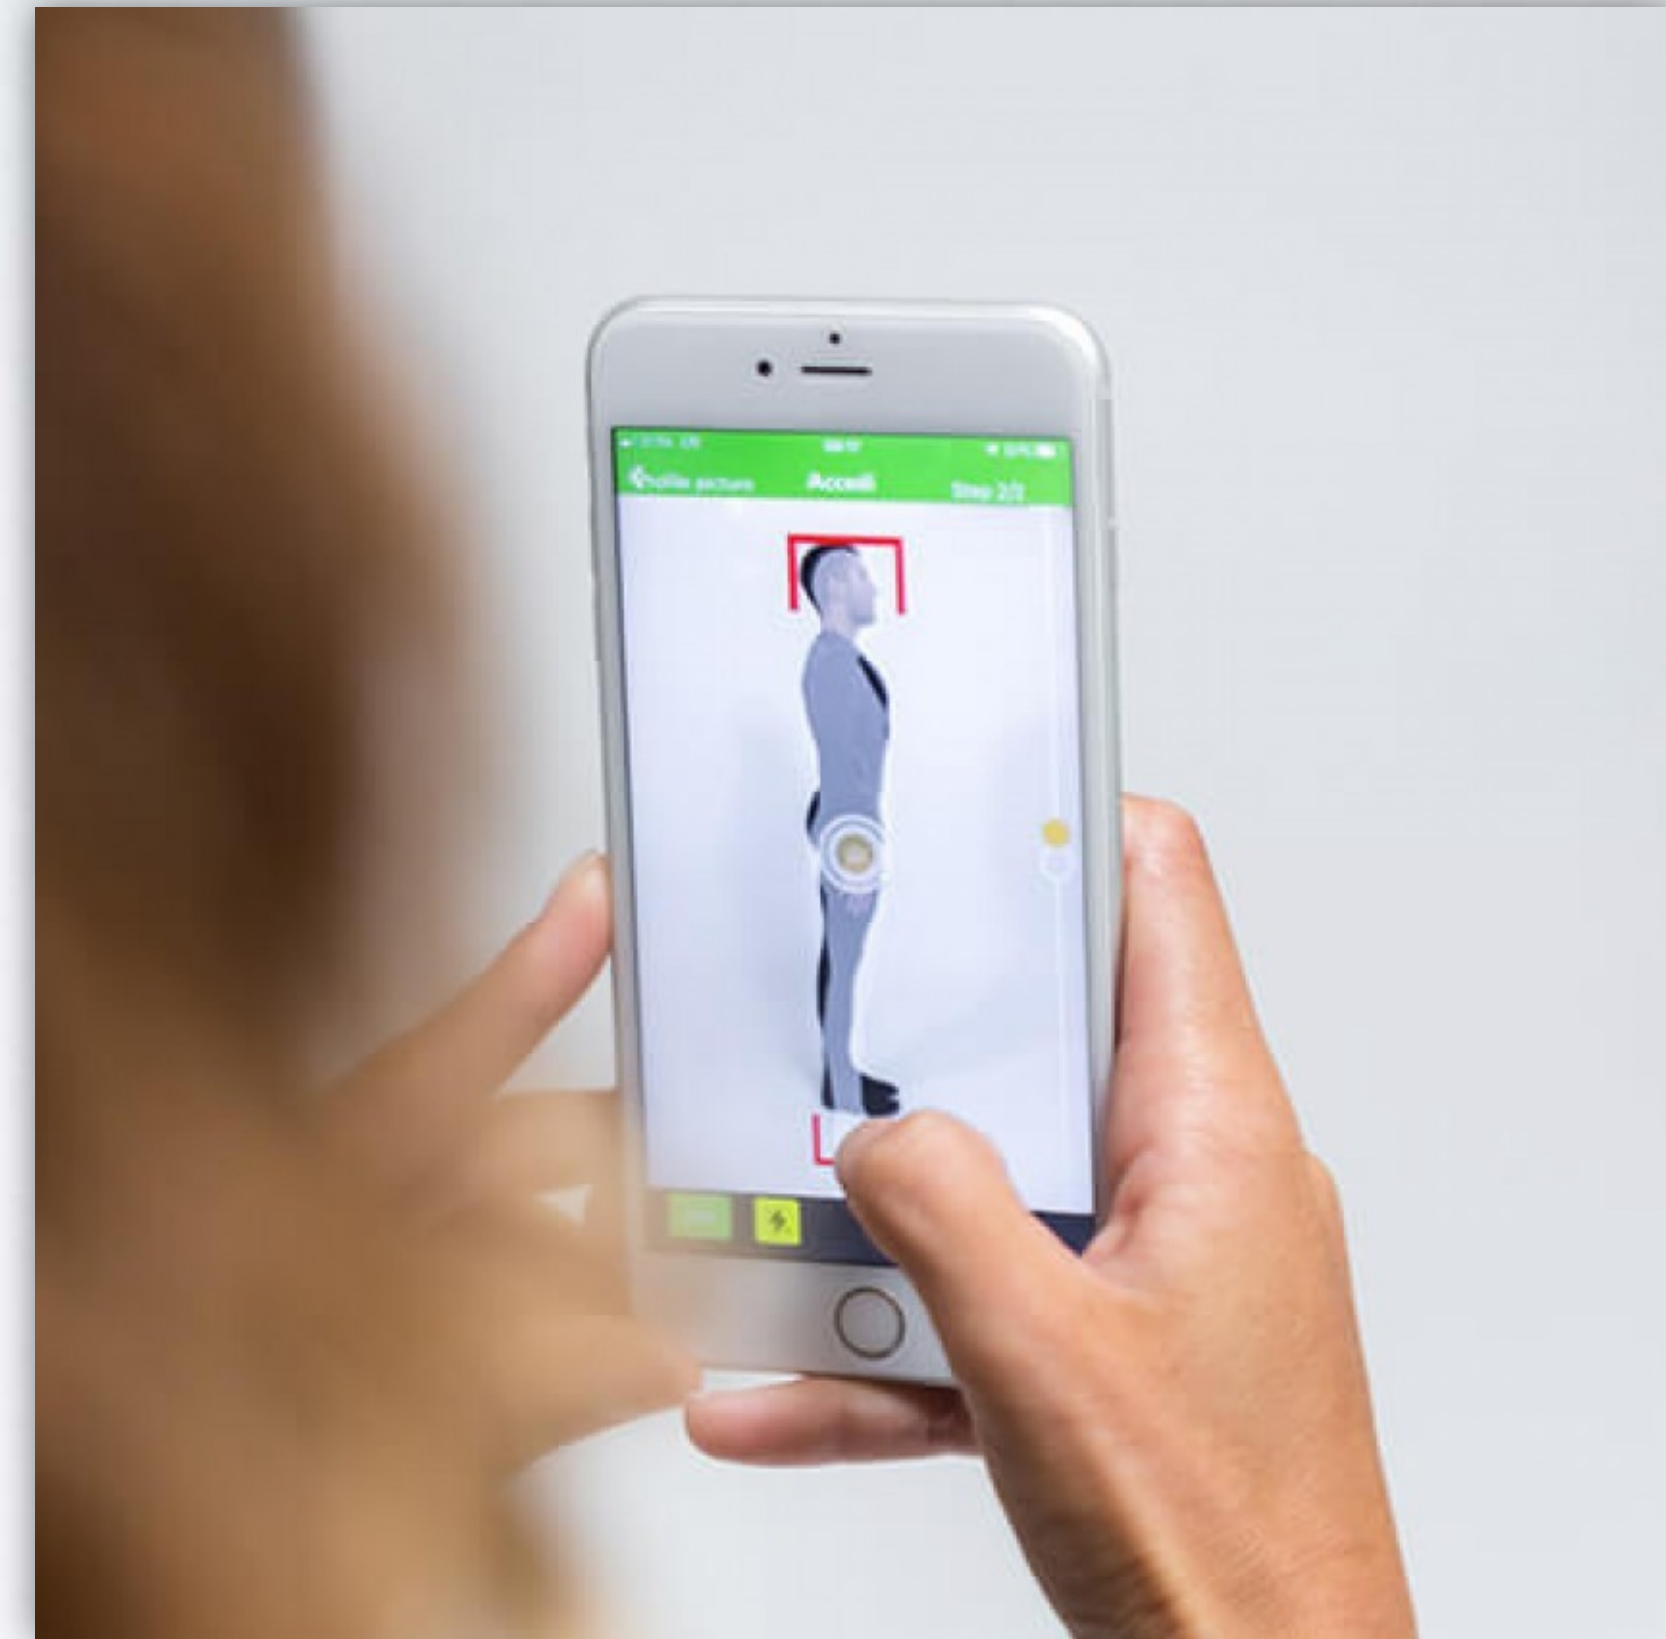

The necessary photographs

From behind

In profile

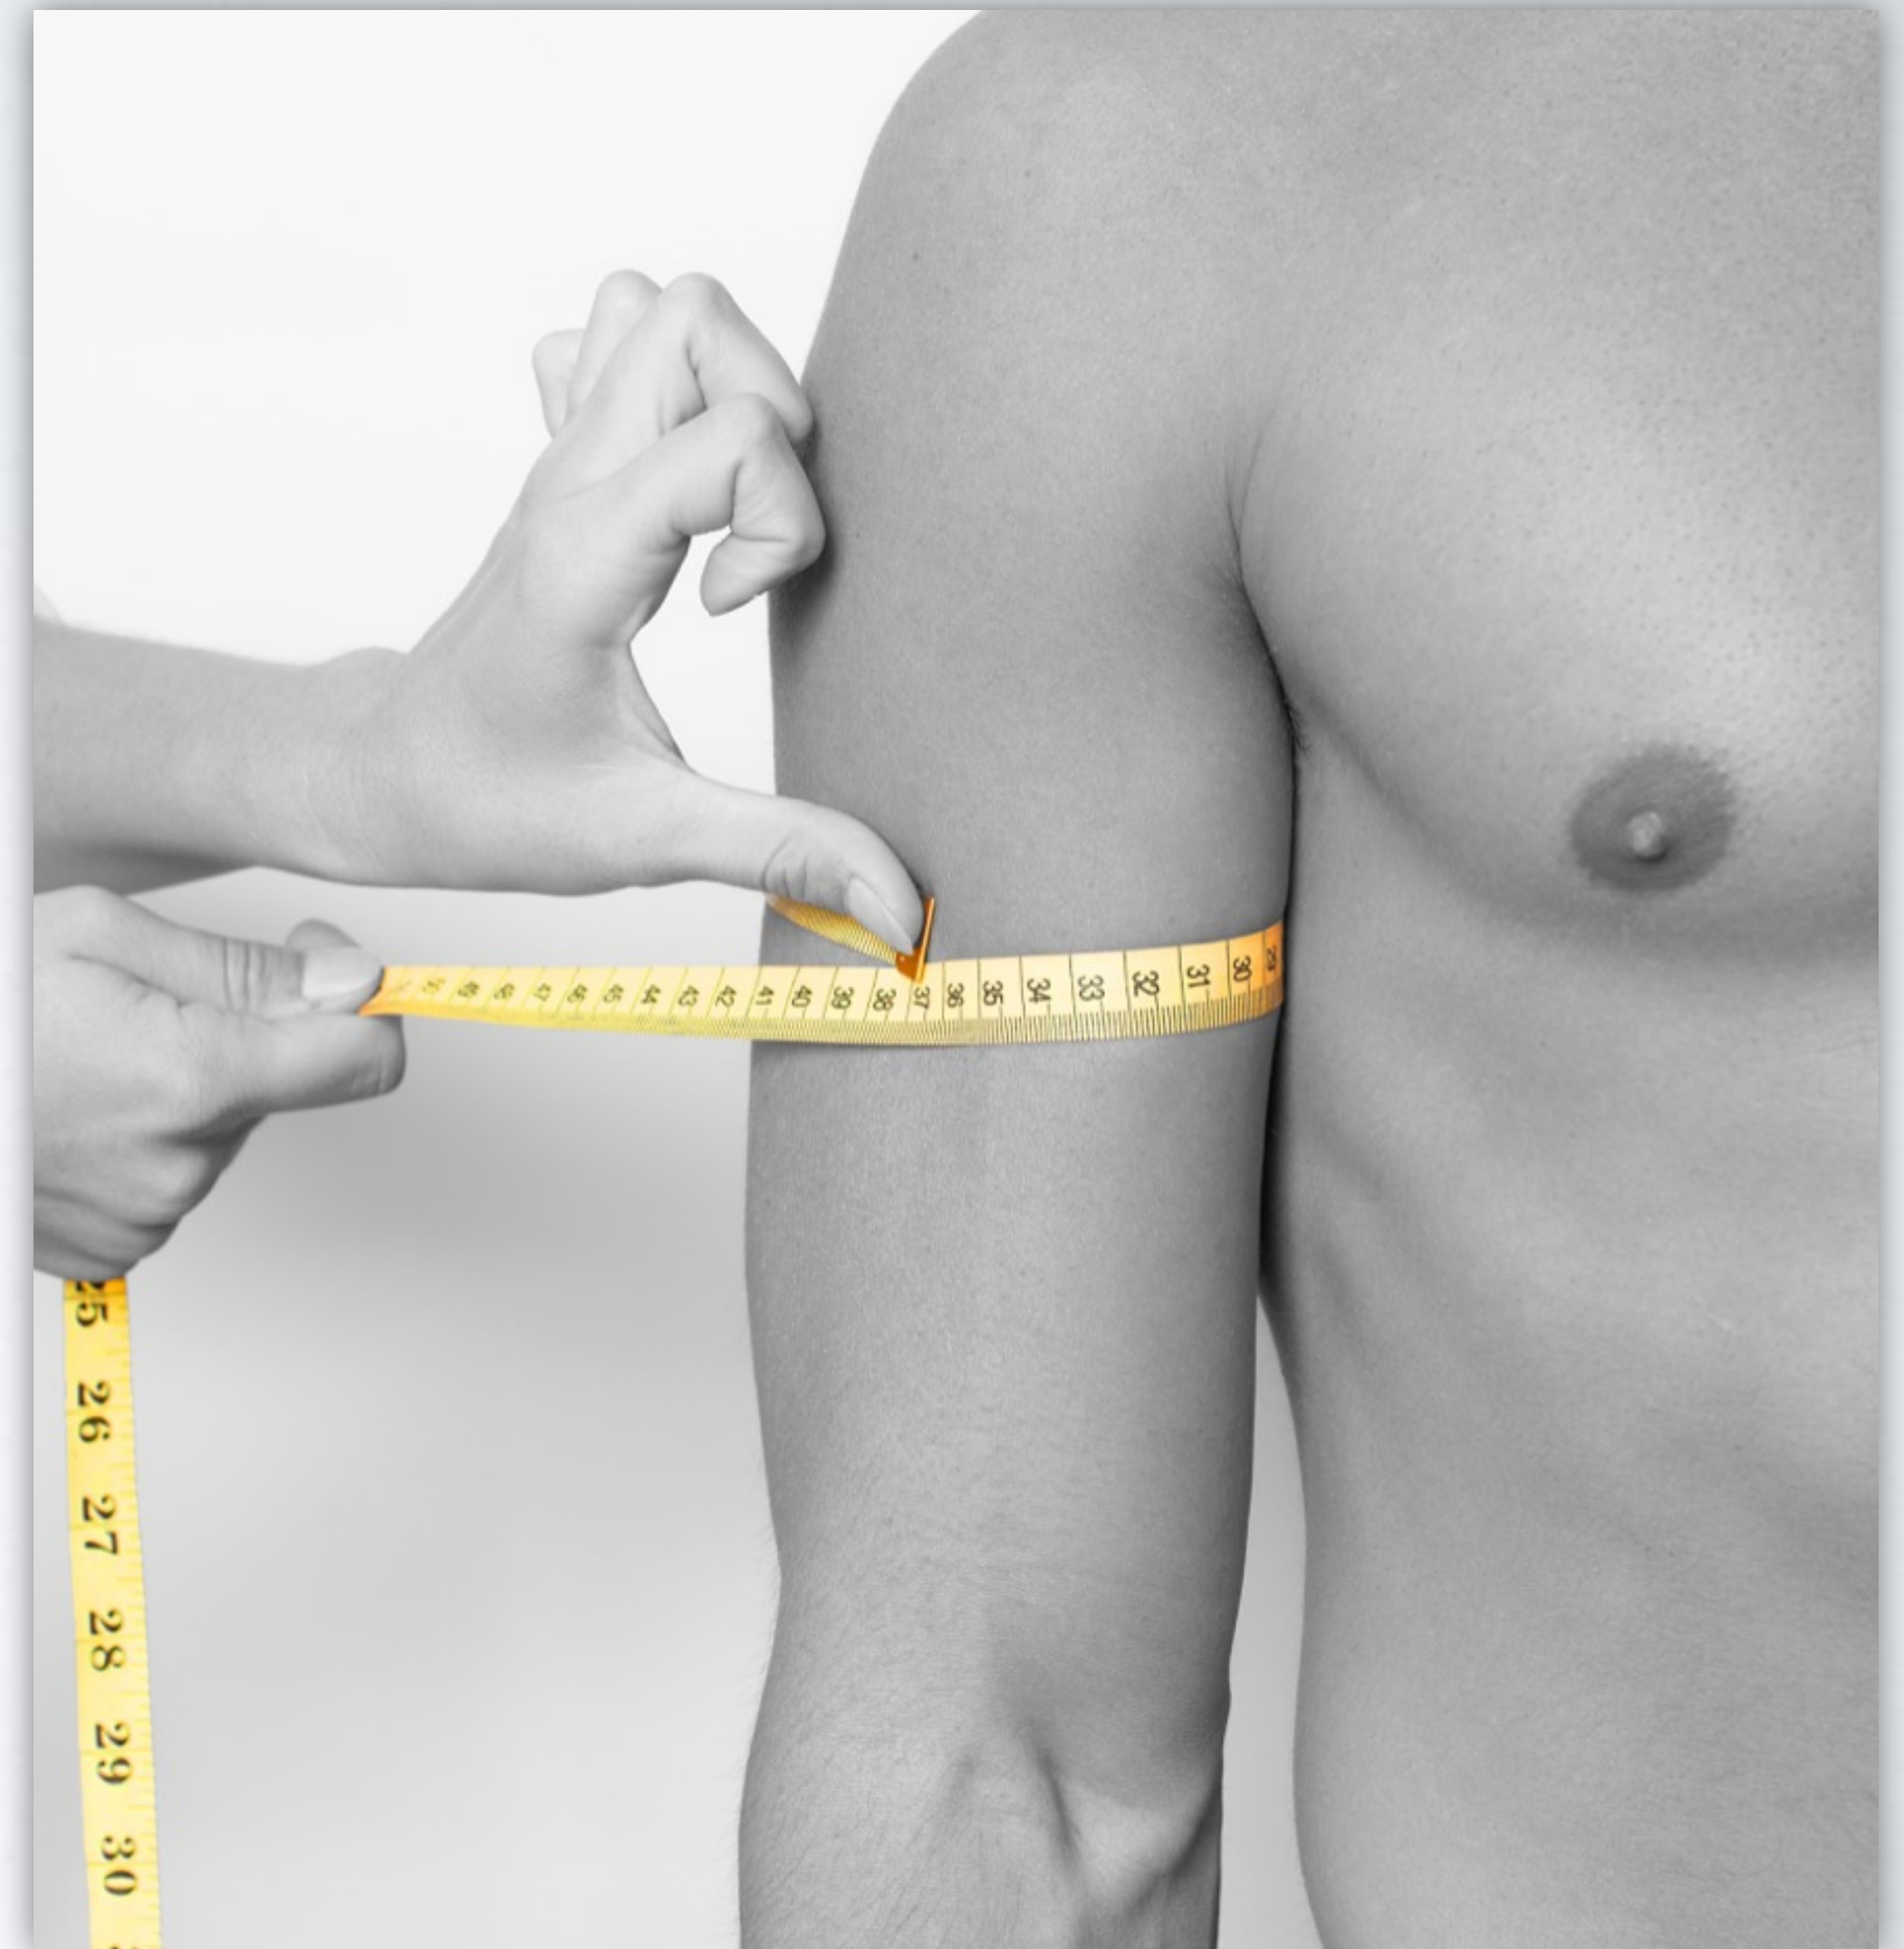

The collected measurements

Circumferences

- Neck
- Chest
- Waistline
- Hip
- Bicep
- Forearm
- Wrist
- Thigh
- Calf
- Ankle

Lengths

- Shoulder breadth
- Upper limb
- Crotch height
- Inner leg
- Outer leg
- Total crotch

Features

User privacy

SizeYou does not require frontal photos that include the user's face.

Proprietary Dataset

SizeYou uses a self-developed dataset that is not available on the market.

Accuracy and repeatability

Unlike manual measurements, those collected by SizeYou guarantee precision, objectivity and repeatability over time.

Technology

SizeYou technology does not require dedicated devices. Moreover, it is the owner, copyright subject, and holder of the international patent filing.

Scientific approach

SizeYou's performances are valid in the scientific field.
